### WEST CLIFTON AVENUE IMPROVEMENT

As part of the City of Cincinnati's ongoing investment to the neighborhood of Clifton Heights, the Department of Transportation and Engineering has begun improvement work on West Clifton Avenue from West McMillan Street to Vine Street. Crews of the Fred A. Nemann Company will narrow the roadway from Klotter Avenue to Ohio Avenue; construct a retaining wall; install rock fall protection; install a new traffic signal; construct concrete curb ramps walks and base pads; resurface the entire roadway; and conduct miscellaneous other work. This work should end by September 2009. The contractor will complete the maintenance in phases, and will normally work from 7 am to 5 pm, Monday through Thursday, although occasionally work may extend beyond 5 pm and may even continue over the weekend. Traffic will be reduced to one lane in each direction for the duration of the project.

Motorists are urged to reduce speed and use caution when driving through the construction area.

The Department of Transportation and Engineering oversees the rehabilitation and improvement of the City of Cincinnati's infrastructure. The Department also provides transportation planning, design, engineering services, structural and geotechnical services, right of way regulation, and construction management. It is the clearinghouse for all City and regional transportation functions, and serves as a liaison to the Southwest Ohio Regional Transit Authority. For more information about the department, visit <http://www.cincinnati-oh.gov/dote>
