**WHAT/WHEN:** Beginning the week of January 2, 2006, crews of Ultra Technic Construction will construct a drilled concrete pier wall with tie-back anchors on Martin Drive at the intersection of Parkside Place in the area of Mt. Adams and Eden Park. The construction will halt the movement of Martin Drive down toward Columbia Parkway. The project will last about 90 days.

**TRAFFIC NOTES:** The following restrictions on local roadways will apply:

Flaggers will maintain two-way traffic through one lane on Martin Drive during working hours. During non-working hours, they will maintain one ten-foot lane in each direction.

No complete closures of Martin Drive should occur.

Motorists should drive slowly and carefully when approaching the construction zone.
